

FICTITIOUS DEMONSTRATION SAMPLE

DIBBS item-readiness library

FICTIONAL DEMONSTRATION SAMPLE. Every item, company, price, document, and date is invented.

Ready before the posting

The item library keeps the records used repeatedly for each NSN in one place. A new solicitation still gets a fresh requirement check. The library removes the need to hunt for the same product, source, pricing, packaging, and quality records every time.

NSN	Approved product	Quote path	Readiness	Next fresh check
4730-01-DEM-0421	Calder CFS-4112-9, CAGE 0DEM7	Automated price-only	Ready: authorization, \$13.42 landed cost, prior price, ISO evidence, and packaging basis on file	Confirm solicitation terms, certificate dates, current cost, and delivery
4820-01-DEM-0755	Calder CFS-2205-7 revision C, CAGE 0DEM7	Documented approved-source packet	Ready: one-lot traceability, manufacturer CoC, material and test reports, receiving inspection, \$37.06 landed cost, exact packaging method, and drawing status on file	Confirm lot coverage, revision, amendment changes, certificate dates, and exact upload order

Price-only item file

Record	Current file value
Dealer authorization	Calder letter valid through 2028-02-03
Landed cost	\$13.42 per unit, effective 2026-06-01
Last fictional award	\$17.65 per unit
Source lead and packaging	21 days plus 5-day packhouse turn
Quality	Meridian ISO 9001:2015 evidence checked 2026-06-30
Standard quote position	Exact product, new manufacture, 30-day delivery when the posting allows it

Documented-packet item file

Record	Current file value
Approved configuration	CFS-2205-7, drawing CFS-2205 revision C
Available lot	CFS-L2606-118, 260 accepted units
Traceability	Heat 6L-4471 through Calder, Ardent Flow, and Meridian receipt
Lot quality	Manufacturer CoC, material report, 260-unit proof and leakage results, 13-piece dimensional sample, incoming inspection
Landed cost	\$37.06 per unit, effective 2026-06-01
Packaging	Method 50 path, capped ports, unit quantity 1, intermediate quantity 10, MIL-STD-129R lot marking

Fresh checks before every response

Check	Why it is repeated
Product and source	Confirms the posting still names the exact manufacturer and part Meridian is authorized to offer
Drawing and lot	Catches a revision change, lot split, or quantity that the staged record no longer covers
Cost and delivery	Prevents an old source price or lead time from reaching the quote form
Certificates and representations	Confirms ISO dates and the dated Section 889 and FASCSA answers remain valid
Submission instructions	Uses the posting's actual fields, amendment terms, and document order for that response

The client decides which items belong in the library and approves the pricing rules. Each new posting is checked against its own terms before Gesso builds the response.
